INDUSTRYPRO
DEMO CASE

Demonstrate the latest technology for control and monitoring systems for industry applications with IndustryPro democase by SLE.

IndustryPro is a solution for easy management, monitoring and maintenance of lighting systems for all industry applications. Achieve higher safety, have greater autonomy and save costs on operation, consumption and maintenance. The key benefits of the solution are:

1.Light Control
- Monitoring the actual state of the system
- Remote manual control of luminaire groups
- Reports about system data (in percentage)

2.Schedulers
- Scheduling settings for luminaire groups
- Transparent graphic demonstration of planned switching

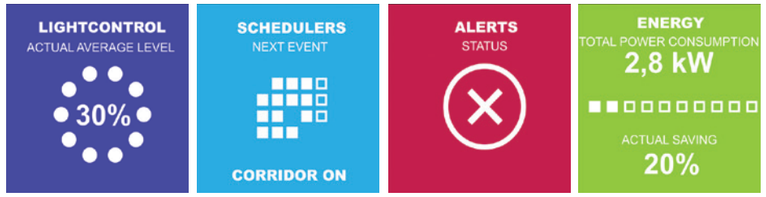
3.Alerts
- Automatically generated reports about failures of luminaires and their light sources
- Notifications about system errors

4.Energy
- Up-to-date reports about energy savings
- Assessment of these reports

List of components:

- WEB CONTROLLER
- POWER RELAY
- MOVEMENT SENSOR
- DAYLIGHT SENSOR
- INPUT UNIT
- POWER METRE
- PETROL STATION / FACTORY / WAREHOUSE SCENE
- REMOTE ACCESS
- WIFI CONNECTION
- RF GAREWAY
- SWITCH INTERFACE
- MANUAL CONTROL
- CONTROL UNIT

AVAILABLE MODULES



VARIABLE DISPLAY OF SCENES: PETROL STATION, FACTORY, WAREHOUSE

Software functionality and benefits:

- The web-based software can be used on any device that is at hand, be it a computer, tablet or smartphone
- User-friendly remote and local control provides great autonomy and allows monitoring the actual state of the luminaires anytime
- Using local server makes it cost-free
- Automated data collection lowers maintenance costs

Developments allow the implementation of further features into IndustryPro:

- Temperature measurements
- Daylight measurements
- Installation of input devices
- Installation of output devices
- History of changes
- Information channel
