

LIGHTING DESIGNER

SLE Smart Lighting Engineering is the world's first lighting solutions platform. We deliver complete smart lighting solutions and provide professional services for architects, lighting designers, project companies, suppliers, researchers, and brands. To strengthen our team of lighting designers, we are looking for a new member who would develop new products and monitor and implement new trends.

Place of work: 906 02 Dojč 419, Slovakia

Contract type: Full-time

Job responsibilities:

- Drafting lighting design proposals in Dialux
- Providing lighting services (audits, calculations, visualisations, etc.)
- Creating energy-saving lighting concepts
- Searching for new lighting solutions and ideas, following the trends and applying them in practice
- Monitoring and analysing activities of the competition
- Active communication with the lighting innovation division and cooperating on new lighting concepts
- Receiving and providing continuous education on products, lighting management systems, LQS, etc.
- Following the legislation changes and updates, communicating the news to the colleagues and implementing them in practice effectively
- Working with sales department and strategic partners during the project realisation
- Supporting the customers through and after the project implementation

Benefits:

- First-hand experience from the CEE industry leader
- Work in dynamic and technologically developed environment
- Interesting salary, yearly bonuses
- Technical trainings
- Laptop and mobile phone also for private use
- Free English lessons
- After-work activities (access to the swimming pools, gym, family days, etc.)

Requirements:

- Min. 1 year of experience as a lighting designer or lighting-related professional
- Technically oriented university degree
- Knowledge of Dialux and AutoCad/VisualCad
- English (Advanced) and/or German (Intermediate)
- Very good communication and presentation skills
- Team spirit, pro-active approach to problem solving
